Allowable Subject Matter

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and apparatus for monitoring characteristics of a tire in a vehicle. Each independent claim identifies the uniquely distinct features:

Regarding claims 1 and 4: "applying a relatively low frequency activation signal to the coil of the exciter; detecting data signal produced in response to a measured tire parameter; downloading the tire data from the exciter to a receiving unit of the vehicle".

Regarding claim 11: "applying a relatively low frequency activation signal to the coil of the exciter; detecting data signal produced in response to a measured tire parameter; a controller to initiate a data transmission from the tire monitor based at least in part on the sensor signal; and a high frequency communication circuit for communicating a relatively high frequency signal including data related to the characteristic of the tire provided to the high frequency communication circuit from the controller".

Regarding claim 15: "a low frequency duplex communication circuit for wireless communication with an exciter; the low frequency duplex communication circuit including: a coil, a receiver circuit coupled to the coil and the controller and responsive to a relatively low frequency interrogation signal from the exciter to generate an activation signal for the controller, and a transmitter circuit coupled to the controller and the coil and responsive to digital data from the controller to convey response data from

the tire monitor to the exciter; and a high frequency communication circuit coupled to the controller to communicate a relatively high frequency signal including data related to the sensed characteristic of the tire provided to the high frequency communication circuit from the controller”.

The cited prior art fail to disclose the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
